CASE STUDY: Shelburne Farms is a membership-supported, non-profit environmental education center whose mission is to cultivate a conservation ethic for a sustainable future. To pursue their mission, they practice rural land uses that are environmentally, economically and culturally sustainable on a 1,400-acre working farm and National Historic Landmark on the shores of Lake Champlain in Shelburne, Vermont.

"PolyWhey is a great fit for our farm house renovation. Not only does it look great, but it meets our mission and desire to use environmentally sustainable practices."

"Shelburne Farms makes an award-winning farmhouse cheddar, so the fact that PolyWhey is derived from whey, a byproduct of cheese making, makes the finish an even better fit for us."

Alex Webb, President
